DIY ACRYLIC WINDOW DOUBLE GLAZING

Do It Yourself house acrylic window double glazing kits.

Insulate your home for winter, make it warmer with less condensation by fitting an inside sheet of insulating clear acrylic to your existing windows.

Just measure your windows and we will supply the high quantity Plexiglas clear acrylic sheets to size together with the self adhesive magnetic strip to hold them. We will cut to the sizes required, what could be easier. We will also supply the self adhesive magnetic strip.

Things to remember to allow an extra 26mm overall on the sheet to adhere the magnet to and that you need twice as much magnet strip as it is on both the window frame and the plastic panel.

The cut panels are supplied with a protective masking to prevent scratching during installation and instructions.

Note: We can arrange fitting if you wish.
