**Maskem** is a product developed exclusively developed to remove the paper masking from acrylic sheet. It releases the adhesive on the paper making it easy to remove in one piece and leaving no residue.

Available in 0.5 and 1.0 litre tins

#### **Instructions**

Apply liberally over masking tape or residue to be removed. Leave until soaked and than scrap or remove paper or tape. To remove remaining residue apply to a clean cleaning cloth and wipe gently. Change cloth sides to avoid scratching the surface. If scratched use XERAPOL® scratch removal. Use ACRI-BOND CLEANER and BRILLIANIZE® antistatic polisher for finishing touches.

#### **Recommended use**

This cleaner has been designed for cleaning of Acrylic. It shows good results with other plastic materials such as Polycarb, ABS and HIPS. Test before use.
