

BoginaBag

BoginaBag (Bog in a Bag) is a unique portable toilet that is extremely light-weight, portable and very robust. It provides the owner with a solution to that age-old question of needing to go but having nowhere to go!

It folds out as a seat in all places, but when nature calls you then remove the cover insert one of our specially designed degradable bags, relax and relieve yourself. When folded, BoginaBag is 65cm in length with a diameter of 13cm. When set up as a toilet the dimensions are 35cm across the seat and the height is 47cm. It weighs just 950 grams and has a user weight limit up to 125kg (19.5 stone).

Pack of 5 bags

Within each pack of bags there are 5 individual toilet bags, that are designed to be used once and then disposed of. The BoginaBag toilet bags are made of a black degradable plastic and designed to fit over the BoginaBag seat completely covering the fabric.

Within each bag is a high absorbent pad that soaks up to 700ml of liquid. Each bag has two handles so once you have finished it can be tied and disposed of in a standard waste bin. These bags are designed to be used for both toilet functions.
